

HENSCHEL TECHNOLOGIES

Stack Your Services. Stack Your Tokens.

The more you bundle, the more free AI you get. Every Henschel service comes with H Tokens built in — they pile up across your stack until AI feels like it costs nothing.

YOUR TOKEN STACK

MSP Package — 50 Users

Full managed services for your team

10,000/mo

+

24/7 Support — Flat Fee

Round-the-clock coverage, one price

+5,000/mo

+

Phone System

Business phones with AI Fleet included

+12,000/mo

=

Your Monthly Token Bundle

From services you already need

27,000/mo

27,000 of 100,000 tokens toward **Unlimited**

That's **27% of the way to Unlimited** — just from the services you're already buying.

HOW PRICING WORKS

Louis prices AI on real math: what the job would cost in human hours × market hourly rate, versus what the AI Fleet delivers it for. **The fee sits in that gap** — cheaper than human labor, priced on the value of the output and the time saved. The bigger the gap, the more you save.

FLEET LEVELS & BURST

Tokens are **included in every AI subscription** — monthly plans are Fleet levels with token allocations. When usage exceeds a level, it bursts into the next one. That's how overflow is gauged and charged — tiered burst pricing, just like overage minutes on a phone plan.

AI so bundled, it feels free.
