

HENSCHEL TECHNOLOGIES

The IT service you were promised, at a fee that respects you.

The Security Bundle

Every machine we manage ships hardened — then we layer on the protection your business actually needs. One bundle. No gaps. No jargon.

WHAT'S INSIDE

Henschel Hardened Build

Every device enrolled, encrypted with BitLocker, baselined to CIS/Microsoft security standards, and verified compliant — before it's trusted. Included in every managed plan.

24/7 Monitoring & EDR

Endpoint detection and response with round-the-clock alerting. When something moves wrong, we know — and we act.

Email Security

Phishing and malware filtering in front of every inbox. The #1 attack vector, closed.

Password Vault & MFA

Company-wide password vault plus phishing-resistant multi-factor authentication. No reused passwords, no weak links.

Enterprise SSO — "Okta Who? This is an Entra House"

One login, everything opens. We run your identity on Microsoft Entra — enterprise single sign-on without the Okta bill. Your M365 licenses may already include it.

Data-Protection Backup

Backups that are actually test-restored. Because a backup you've never restored is a rumor.

Security Awareness Training

Your people are the firewall's front line. Short, ongoing training that makes phishing fail.

Quarterly Security Review

We sit down, go through your posture, and show you exactly where you stand — in plain English.

Our promise: security isn't an upsell with us — it's the foundation. The Hardened Build ships with every managed machine, and the full bundle wraps your whole business in one accountable package. **One throat to choke.**

Start with a free security evaluation.
